About Seeing Machines

Seeing Machines, (AIM: SEE) is an industry leader in computer vision technologies which enable machines to see, understand and assist people. Seeing Machines deploys its FOVIO machine learning platform to deliver precision sensing and interpretation of heads, faces and eyes for these purposes. A key application today is Driver Monitoring Systems to assess drowsiness, distraction and cognitive state which is a key enabling technology for Automotive ADAS and Autonomous Driving as well as for Guardian, our Commercial Fleet solution. The Guardian retrofit telematics solution combines an in-cabin safety intervention system with cloud monitoring and analytics services provisioned on a SaaS basis which prevents accidents - saving costs and lives. Other markets include Aviation, Rail and Off-Road as well as the broader precision eye tracking market. The company offers a range of proprietary solutions from embedded software to processors and system products. Seeing Machines is headquartered in Canberra, Australia and has offices in Melbourne, Tucson, Silicon Valley, Detroit and the UK.
